Speakers

Versatile design

Inspired by theatrical lighting design, the Madison Fielding Stagelight Monitor is engineered to integrate seamlessly and discretely into lighting truss systems. With its hang- or mount-anywhere bracket, the Stagelight Monitor can be used on stages as vocal monitors or side fills. This high-performance speaker can be used in

home theaters, as well as in nightclubs, restaurants, live venue theaters, mobile DJ systems, shopping malls and schools. *Madison Fielding Inc.*

Decora-Style Insert

For custom plates

DirectConnect offers a new decora-style insert to its line of custom plates. The DK2SVGA insert fits decora-style cover plates and features SVGA female-to-female connection and two additional keystone holes for various applications. Installers can choose from Cat 5E, RCA, F, BNC, SVHS, or can fill with blank inserts for future use. *DirectConnect.*

Speakers

With installation tools

All six model ze speakers employ coNEXTion's patented Z-tool™ and Snaplok™ angling baffle system for tool-free installation. The z600c features a three-way all-aluminum design using an 8-inch woofer with a 1.5-inch voice coil and 1.5-inch midrange; the z500c features a three-way design using an 8-inch poly woofer with a 1.5-inch voice coil and a 1-inch silk dome Direct Axis Extending Tweeter™. The line also includes the z400c, the z200c and the z100c. *coNEXTion Systems.*

IR Receiver

Cost reduced by 40 percent

Xantech's 291-90 Hidden Link IR receiver is designed to reject interference from plasma displays, direct sunlight and fluorescent tube lights for most accurate IR signal reception. The receiver works in non-fixed installations and is designed with a small form factor that fits on the edge of a plasma screen. The 291-90 includes a lens for decorator-style wall plates and a system for testing talkback LEDs. *Xantech Corp.*

Cable Veil

Conceals wires

The Cable Veil conceals wires and cables behind A/V components and standardizes component depths. Black on one side and silver on the other, the Cable Veil is available in three sizes. The device is made of a special malleable aluminum alloy bent by hand to the outside dimensions of an A/V component. The shaped Cable Veil is placed behind the component to conceal the cables. *WireHide Inc.*

CCTV Cable

For video surveillance

The Power/Watch™ Cable family is the latest cable technology breakthrough from Coleman Cable for video surveillance applications. Now, with a single unshielded twisted-pair cable, it's possible to send power, video and control signals over longer distances than with ordinary CCTV cables, according to the manufacturer. Power/Watch is designed to provide bottom-line benefits, including better systems management and lower lifetime system costs. *Coleman Cable.*

Dual Tuner

Satellite radio option

Russound's ST2 Smart Dual tuner now features XM Satellite Radio as an option. When used in a multi-room system, the extensive choice of programming and near CD-quality sound can be achieved anywhere in the home at the touch of a button. The ST2 is still offered in its current standard configuration with two AM/FM tuner modules; the new version, named ST2-XM, is supplied with one XM and one AM/FM module. *Russound.*

In-Wall Speakers

Quick installation

MartinLogan's Voyage™ and Passage™ in-wall loudspeakers are designed to provide quick installation, and include die-cast aluminum mounting locks and a detailed installation template. The speakers feature high-excursion aluminum woofers, audiophile-grade crossovers, an extended aluminum chassis and an adjustable tweeter alignment sphere. The speakers are IR repeater-ready, and they are available with paintable end caps and a selection of grille color options. Frequency response for Voyage speakers is 40 to 20,000 Hertz at ± 3 decibels, and for Passage speakers is 45 to 20,000 Hertz at ± 3 decibels. *MartinLogan.*

Speaker Technology

Transforms flat surfaces

Induction Dynamics' SolidDrive™ is designed to transform drywall ceilings.

Projector Mounts

Universal designs

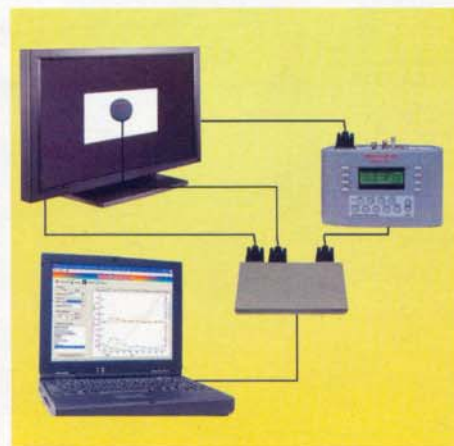

Chief Manufacturing's new UPA series of universal projector mounts is designed with four different kit options that fit most current projectors on the market. Customers can choose from the UPA-1000 universal projector mount, the UPA-1001 universal projector mount with flush ceiling kit, the UPA-1002 universal projector mount with a 13- to 23-inch extension kit or the UPA-1003 universal projector mount with a 23- to 43-inch extension kit. The UPA series features steel construction with a weight capacity of 50 pounds and is available in black or silver. *Chief Manufacturing.*

PC Calibration

Automated

Speaker

Full-range driver

NuVo Technologies introduces new NV-CN6C contractor-grade speakers as a high-quality solution for track home developments. Each speaker features a full-range driver with a whizzer cone for compact, full-range sound and integrated "dog ear"-style mounting. In addition, the speakers boast the same attractive micro-perforation grille as NuVo's new AccentPLUS1 architectural speakers, giving them a low-profile appearance. *NuVo Technologies.*
