### FANTASTIC VOYAGE <<

MartinLogan invites you along on a fantastic audio voyage with their newest in-wall loudspeaker, the Voyage. With high-resolution Advanced Thin Film (ATF) transducers and high-excursion, aluminum-element woofers, these in-wall speakers promise clarity, resolution, and detail. They also come with a rigid, full-size installation template, complete with quick-reference installation instructions, a handle, and die-cut guides to mark the cutout hole. The Voyage's Vojtko crossover has massive air-core coil inductors, mounted to 1/8-inch-thick, high-rigidity circuit boards with ultrawide traces. The speaker is designed to be mounted either horizontally or vertically, the endcaps can be painted the color of your choice, and a selection of grille colors is available. \$1995 each. MartinLogan, (785) 749-0133, [www.martinlogan.com](http://www.martinlogan.com).
