P-5xe phono preamplifier

“Utterly transparent—a clear window into the musical performance.”

– Jason Thorpe, *SoundStage*

“...remarkable not only for its weight and authority, but for its extraordinary articulation and resolution of low level details.”

– Shane Buettner, *The Critical Ear*

Enjoy your vinyl collection as never before. The Ayre P-5xe phono preamplifier uncovers the astounding musicality in your favorite records. Music flows from a pure black background, thanks to ultra-low-noise circuitry in a zero-feedback configuration. Fully adjustable gain and loading options provide complete compatibility with the widest possible range of cartridges, from low-output exotic moving coils to high-output moving magnet designs. Our proprietary two-stage passive RIAA equalization ensures unparalleled tonal realism. Bring your records to life with the Ayre P-5xe.

Features:

- Zero-feedback, fully-balanced discrete circuitry
- Two-stage passive RIAA equalization
- Balanced and single-ended inputs and outputs
- Adjustable gain accommodates all phono cartridges
- Cartridge loading is adjustable with switches on back of unit
- Special high-speed circuit board material
- Ayre Conditioner™ (patent pending) power-line RFI filter

Specifications:

- Gain: 50 dB, 60 dB, 70 dB to balanced outputs
44 dB, 54 dB, 64 dB to single-ended outputs
- Input Impedance: 47 k Ω , 1000 Ω , 100 Ω
- Frequency Response: RIAA curve accurate to ± 0.05 dB
- Power Consumption: 10 watts
- Dimensions: 17.25"W x 13.75"D x 2.38"H
- Weight: 12 pounds (5.5 kg)

The heart and soul of music and film reproduction.
